Cold	All Regions	Southern/Inland	Inland				
River Flooding							
Wind			Southern	Southern	Southern		Coastal
Heavy Rain Flash Flooding / Debris Flow							Coastal
Snow						Inland (Sierra)	Inland (Sierra)

Risk Levels

Little to None

Minor

Moderate

Major

Extreme

Weather Key Points

Regional Operations Center

Western Region

Monday, November 21

- Lighter winds are expected today through Wednesday, but occasional breezes, very dry fuels and warmer temperatures will keep locally elevated fire weather conditions in place for areas away from the coast in southern California
- Potential for a weaker Santa Ana wind event Wednesday night into Friday across southern California, with 25-40 mph gusts
 - Due to warmer temperatures, very dry conditions, and the potential for gusty winds, brief critical fire weather conditions are possible during this time frame. However, small chance of Red Flag conditions unless wind speeds trend stronger.
- Very cold overnight temperatures will start to be focused mainly across inland regions through the middle of the week
- Light rain and mountain snow is possible across portions of far northern California Tuesday into Wednesday, though at this time no precipitation accumulations or significant impacts are expected
- Better chances for rain and mountain snow across northern California next weekend, with heavy precipitation possible across coastal regions and in the Sierra, but exact details still remain uncertain at this time

Daily Precipitation Forecast

Regional Operations Center

Western Region

Monday, November 21

Monday

Tuesday

Wednesday

Important Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms will produce locally much higher rainfall amounts.

Precipitation (inches)

Weather Outlook (6-14 Days)

Regional Operations Center

Western Region

Monday, November 21

6-10 Day Outlook (November 26 - 30)

Temperatures

- Near normal temperatures are favored statewide

Precipitation

- Above normal precipitation is favored statewide

8-14 Day Outlook (November 28 - December 4)

Temperatures

- Below normal temperatures are favored statewide

Precipitation

- Above normal precipitation is favored statewide

Impact Level Definition

1. **Impactful weather is not expected.**
2. **Potential threat to lives and property if no/incorrect actions are taken.**
 - a. Localized impacts on commerce possible.
 - b. Includes events that occur frequently.
3. **Potential threat to lives and property if no/incorrect actions are taken.**
 - a. Impacts on commerce possible.
 - b. Includes events that occur a few times per year.
4. **Actions likely needed to save lives and/or property.**
 - a. Significant impacts to commerce possible.
 - b. Includes events that occur infrequently.
5. **Actions required to save lives and/or property.**
 - a. Significant and extended impacts to commerce.
 - b. Includes exceptionally rare events.
